NEW LONDON'S POLICE DEPT. MUDDLE

(Special to The Bulletin.)

New London, May 16.—The cases are all too frequent when brothers are arrayed against brothers, but it indeed is rare for one pair of brothers-in-law to be battling against another pair of brothers-in-law as is the condition that prevails in the present disagreeable muddle in the police department of the city of New London. It is Mayor Morgan and Senior Alderman Chappell, chairman of the police committee, on the one side, and Alderman Fitzpatrick and Policeman John Cavanaugh on the other, with the last (Special to The Bulletin.) ritzpatrick and Policeman John Cavanaugh on the other, with the last

lice committee taking Cavanaugh from the detective force where he had been doing really meritorious work and placing him on patrol duty on the outskirts of East New London on night duty, and, so far as can be learned from the mistaken supposition that he had given an item of police news to a local newspaper. This was the charge against him and the punishment was administered without the required hearing.

The charge has been denied by the officer and by the newspaper and not proven by the committee. At a meeting of the court of common council Alderman Fitzpatrick, backed by a largely signed petition, made motion that a special committee be appointed to investigate the police department, including the work of the committee, and this was denied, the mayor referring the matter to the police committee, should the committee members condescend to give a hearing. Specific charges have been made by Alderman Fitzpatrick, so there is no lack of material for investigation.

This action displeased the police committee and a private session of the committee and a private session of the committee was nother shade, especially to the many instances the most frequent patrons of the barber shop are committee and a private session of the committee and a private session of the committee was head last Monday might.

This action displeased the police committee and a private session of the committee was held last Monday night with Policeman Cavanaugh present and two days later a report of the session was given out for publication. There were discrepencies in that report, according to Officer Cavanaugh, and he made public denial, and, to the public, it has become a question of veracity between the officer and the senior alderman.

Fortunately for the readers of the newspapers the reporters do not have o depend on members of the police department to get police news, but requently reporters are of material aid to officers in getting details in im-portant cases. The reporter can get along better without the police officer
